FEATURES & BENEFITS

Blue Ridge has a range of different colors on each side of the stone, including deep smoky blue, bronze, brown and rust.

The palette is rustic in nature, making this stone suitable to homes set in the woods, along waterfronts and in more urban settings, when paired with glass and various metals.

Blue Ridge is a relatively soft stone that will shape easily but will shatter when cut at a 90 degree angle and may chip or fracture along its edges.

In areas of high moisture, water will migrate along the bedding planes and freeze thaw will split the stone apart.
