USES

Interior and exterior adhered veneer, including house fronts, commercial facades, foundations, columns, chimneys, fireplaces and surrounds, hearths, exterior and interior walls, outdoor kitchens and fireplaces.

FEATURES & BENEFITS

Stony Point Mosaic offers the same beauty and solid finished look as the building stone, but with the appeal of efficient and lightweight installation. It is crafted from natural fieldstone and is cut to bring out the optimum color and texture of the original stone, unveiling hues of warm tan, rich brown, shades of gray and hints of burgundy. The physical appearance of the stone offers a rich natural, weathered look that is perfect for rustic lodges and cabins, cottages and casual settings.

This locally sourced material may qualify as a LEED product for the Maryland, Virginia, and North Carolina markets.

Stony Point Mosaic can be installed below grade and usually requires no footers or additional support. Check with local building codes before installing material. It is an easy stone to work with, is absorbent and lightweight, and adheres well.

The information contained in this document is provided to explain the most commonly asked questions about stone and its uses. This document serves as a general guideline and the information provided within is not meant for exact structural specifications.
